2D ANIMATOR

I am a hard-working, bubbly, enthusiastic animator with a strong proficiency in 2D rigged animation. I have worked with a wide range of clients such as RTEJr, Netflix and HBO on productions which I am immensely proud of. I thrive when working within a team environment and also as an individual.

EXPERIENCE

Wonder Pets: In the City - *Apple TV - 2D TV Series*

Had the amazing opportunity to work with Kavaleer again as a character animator on the Wonder Pets using Adobe After Effects.
This was a really amazing learning and working experience as I was faced with a big learning curve of animating within After Effects for the first time alongside using complex rigs within the program.
